## **MHS COVID Pandemic Response**

**Spring 2020:** The last in person day for students was Thursday, March 12, 2020. At that time, MHS was in the middle of the third quarter. The students were able to complete work for quarter 3 without being penalized for work not completed. The quarter 3 grades froze the day that we left school and students grades could only go up. A letter grade was assigned for the third quarter with the lowest possible grade being a 60% (D-). The quarter closed on April 7th. The 4th quarter was engagement and enrichment and students were graded pass or fail. A student was not penalized if they had issues with the internet or accessing assignments. The final average was the first three quarters if a student passed quarter 4. If a student failed quarter 4, then the final average was all four quarters. The lowest failing grade for quarter 4 was a 50%. Students did not fail quarter 4 if they did not have access to the internet or had a family hardship.

**2020-2021 School Year:** The school year for students began 10 days later on September 14, 2020. The first quarter will end on November 13, 2020. This year, families had the opportunity to make a choice to be fully remote or return to school under the remote-hybrid model. The fully remote students have a range of courses from MHS, Edgenuity, and Virtual High School. The goal was to try to get students with MHS teachers for remote learning, but in order to meet all of the needs of students and based on teacher availability, students also are in Edgenuity and Virtual High School courses. If we do not offer an MHS remote option, then the student is taking courses through Edgenuity or Virtual High School. Edgenuity courses involve rigorous interactive instructional activities designed to build critical thinking skills. Their curriculum was reviewed and matched appropriately with its MHS equivalent course. Each Edgenuity course includes direct instruction videos, interactive tasks and assignments, interactive learning tools as well as various assessments. Virtual High School, VHS, has a teacher that is set up with a classroom of students, just like a typical high school course. There are class discussions as well as individual discussions with students along with assignments. These courses take place asynchronously, which allows students to complete their work anytime in order to meet due dates set by the teacher. Students that chose the remote-hybrid model followed their MHS schedule remotely until October 5th and then returned to the high school in a hybrid model. The hybrid consists of students being broken into two cohorts based on their last name and only half of the school is in the building at one time. Beginning in April 2021, all students returned full in-person. Students who were fully remote were able to stay remote and again, students were allowed to change models at this Quarter 4 break.

When students changed learning models, a “W” is indicated on their transcript to note the switch for each class. If a student changed from fully-remote to in-person, they were withdrawn from their Edgenuity courses and placed into a corresponding MHS course if available. If a student changed from in-person to fully-remote, they were placed into MHS remote courses if offered or Edgenuity courses. When moving into the Edgenuity courses, students were withdrawn from their MHS in-person courses.

The next two pages consists of a comprehensive list of the Edgenuity course offerings. The course names have been abbreviated due to the character limit on the transcript. This is a guide that outlines the full Edgenuity course name.
