## MVMS

- Much of the current lab equipment is outdated, broken, or poorly functioning.

## SCIENCE MATERIALS

One Time: $\mathbf{\$ 1 3 , 7 8 8}$

- For example, this hot plate has permanent staining and a broken knob. Additionally, you can note that this is labelled "MMS" from when the middle school was still located in the Village School building
- These microscopes are partially functioning. The knobs on the left one do not spin enough to fully focus on the objects, while the one on the right has a bulb that constantly malfunctions. We do pay for cleaning and maintenance of the microscopes, but the cost of that is rising due to the age of the devices

## WORLD LANGUAGE

Recurring: \$2,100

- These are new (Spanish only for now) and would be in addition to performance and achievement exams which are already given. Proficiency-based assessments are the "i-Ready" of World Language. $\$ 3$ per student per academic year -- On average 100-110 students per year -- \$300 - \$330
- Cultural experiences in language learning provide exposure to diverse cultures which might not be experienced in a non-diverse setting. These experiences (such as food sampling) provide a multi-sensory lesson which is a part of any language learning; For example: replacing/buying new plastic molds for Las calaveras - Dia de los muertos, sugar, merengue, etc.
- Importance of creating and simulating authentic cultural experiences as much as possible. (Posters, laminating, maracas, sombreros. Papel picado, etc. (for example)

- Conferences, both live and online, are incredibly helpful and beneficial to nurture and encourage educators to continue being lifelong learners. Content-related professional development directly enhances student instruction.

| What | Why? |
| :---: | :---: |
| MVMS | - Once clay has become dried out from being overworked (something that happens a lot in elementary and middle school classrooms) it becomes unusable and needs to be thrown out. Pug mills recycle this unusable clay and turn it into clay that is ready to be used. This would save a lot of clay waste and would cut down on the need to buy so much clay every year. <br> - This machine quickly and easily creates large slabs of clay. This would allow students to spend less time individually rolling out each piece of clay for their work and more time actually designing and building their artwork <br> - This past year I was able to purchase the 24 -pack of these (they are also expensive but less so). They have really enriched my curriculum this year, but the 24 pack lacks many of the tertiary and neutral colors that we learn about and use in our color theory unit. This larger pack would allow for a more seamless transition from learning the concept to demonstrating the skill. <br> - As the high school does not currently offer a printmaking course, the work that we do in my classroom is the students only interaction with any printmaking. Because of that, any access I can give them to higher quality tools and materials is very exciting. A printing press would allow for all kinds of creative opportunities. |

## ATTENDANCE CLERK

Recurring: \$17,000

- Many moving parts in the Main Office require immediate attention.
- As daily attendance is needed at the beginning of the school day, this is an added stressor to an already busy Main Office.
- Attendance is critical and needs to be timely and accurate.
- This is a safety and accountability issue as it is important to have accurate attendance to account for students as well as reporting this information to DESE.
- The Main Office was much more efficient when we had an Attendance Clerk in previous years.
